

Sobhan Azimzadeh

Full-Stack Software Engineer — Vue / Nuxt · Go · Flutter · DevOps

sobhanazimzadeh@gmail.com | +98 905 843 2452 | Remote (Worldwide) · Iran / UAE | [GitHub](#) | [LinkedIn](#)

Full-stack software engineer and technical founder with six years shipping production web and mobile apps end-to-end — Vue/Nuxt and Flutter front-ends, Go/Python/PHP back-ends, PostgreSQL & Redis, and the DevOps (Docker, Kubernetes, CI/CD) to run them. Founder & CEO of TECSO and NOXIOAI — an AI-automation platform whose autonomous-agent engine (JARVIS) runs in production; also architected resilient network infrastructure for humanitarian disaster response at the Red Crescent. Open to remote roles worldwide.

EXPERIENCE

Founder & Lead Engineer, NOXIOAI — Remote · noxioai.com 2026 – Present

- Founded an AI-automation SaaS; designed and shipped the full production stack single-handedly: Nuxt 3, Go, PostgreSQL on a hardened Linux VPS (Caddy, systemd, backups, monitoring).
- Built JARVIS, a multi-tenant autonomous-agent engine (LLM-driven, human-approval gates over Telegram) running in production.
- Launched a productized service line (web delivery, automation, care plans) and acquired the first paying customers.

Chief Executive Officer & Full-Stack Engineer, TECSO (Tecso Team) — Urmia, Iran · Remote May 2021 – Present

- Founded and lead a software studio; architect and ship full-stack apps: Nuxt 3 / Vue 3, Go / Python / PHP, PostgreSQL, MySQL, Redis.
- Own DevOps end-to-end: Docker, Linux, Nginx, CI/CD (GitHub Actions), Cloudflare and automated SSL.
- Lead a cross-functional team from proposal through launch and support; delivered RTL/i18n e-commerce and an AI-employee platform.

Assistant to the Head of IT & Communications, Red Crescent Society of West Azerbaijan Province — Urmia, Iran · On-site

May 2024 – May 2025

- Designed and deployed standardized, multi-branch network infrastructure (Cisco, MikroTik, Juniper) for humanitarian operations.
- Managed HP ProLiant servers and Juniper firewalls; supported testing, deployment and documentation.
- Built emergency networking solutions for disaster readiness and mentored networking interns.

Chief Operating Officer & Head of Design/Programming, Saxtiran Platform — Urmia, Iran · Hybrid Oct 2022 – Jul 2024

- Led cross-functional teams and the full platform lifecycle — architecture to launch and growth.
- Architected Go microservices, Vue.js front-end, Flutter mobile, REST & GraphQL APIs.
- Implemented CI/CD, Docker, Kubernetes and monitoring (Prometheus, Grafana); added AI chatbots and virtual tours.

Full-Stack Web Developer (Freelance), Independent / Global — Remote Jan 2020 – Apr 2025

- Go backends — secure, scalable REST & GraphQL APIs with PostgreSQL, MongoDB, Redis and Kafka.
- Vue.js front-ends and cross-platform Flutter mobile apps; Docker, Kubernetes, CI/CD, AWS / GCP.
- UI/UX design with wireframes and prototypes in Figma and Adobe XD.

Proposal Maker & Business Strategy Consultant (Freelance), Independent — Urmia, Iran · Remote

Mar 2021 – May 2025

- End-to-end, strategy-driven B2B proposals: needs analysis, value propositions, timelines, budgets — winning contracts.
- SWOT and competitive research for market positioning; visually impactful, on-brand proposal design in Figma / Adobe XD.

SELECTED PROJECTS

Digikala Clone — Full-Stack E-commerce — Nuxt 3, Go (chi), PostgreSQL, Redis, Docker, CI/CD · github.com/sobhanaz/digikala-clone

Production-grade FA/RTL storefront: phone-OTP auth (JWT + refresh), cart and checkout with server-side price snapshots, live search; injection-safe Go API, one-command Docker dev, CI/CD to a live demo.

NOXIOAI / JARVIS — AI-Employee Platform — Nuxt 3, Go, PostgreSQL, LLM agents · noxioai.com

Bilingual (FA/EN) SaaS where businesses run marketing, support and dev through autonomous AI 'employees'; JARVIS multi-tenant agent engine live in production with approval-gated outbound actions.

parsi-text — Persian Text Toolkit — TypeScript, npm · github.com/sobhanaz/parsi-text

Zero-dependency TypeScript library for Persian/Farsi text: digit conversion, Arabic→Persian normalization, RTL detection. Published on npm.

Advanced SEO Metrics Analyzer — React, Tailwind, Chrome Extension (MV3) · github.com/sobhanaz/Advanced-SEO-Metrics-Analyzer

On-page, technical, content and off-page SEO auditing with Core Web Vitals and PDF/JSON/CSV export.

alpha-ssl — Bash, ACME, Let's Encrypt · github.com/sobhanaz/alpha-ssl-master

Enterprise SSL automation — multi-domain, panel integration, zero-downtime deployment.

TECHNICAL SKILLS

Frontend: Vue / Nuxt 3, JavaScript (ES6+), TypeScript, HTML/CSS/SCSS, Tailwind, React

Backend & APIs: Go, Python, PHP / Laravel, Node.js, REST & GraphQL

Mobile, Data & Cloud: Flutter, PostgreSQL, Redis, MongoDB, Kafka, AWS / GCP

DevOps & Networking: Docker, Kubernetes, Linux/Shell, CI/CD (GitHub Actions), Nginx, Cloudflare, Cisco / MikroTik / Juniper

Design & Strategy: Figma, Adobe XD, UI/UX, Proposal writing & business strategy, SEO
